Aareal Sign

Payments release – mobile, secure and efficient

Aareal Sign is the mobile solution for secure and efficient payments release – any time and anywhere.

With this app, authorised users can check, release or cancel payment orders with their iPhone or iPad.

The app is based on the Electronic Distributed Signature (EDS) process, a core feature of the EBICS standard. It also provides users with a flexible solution for managing their payments via mobile devices.
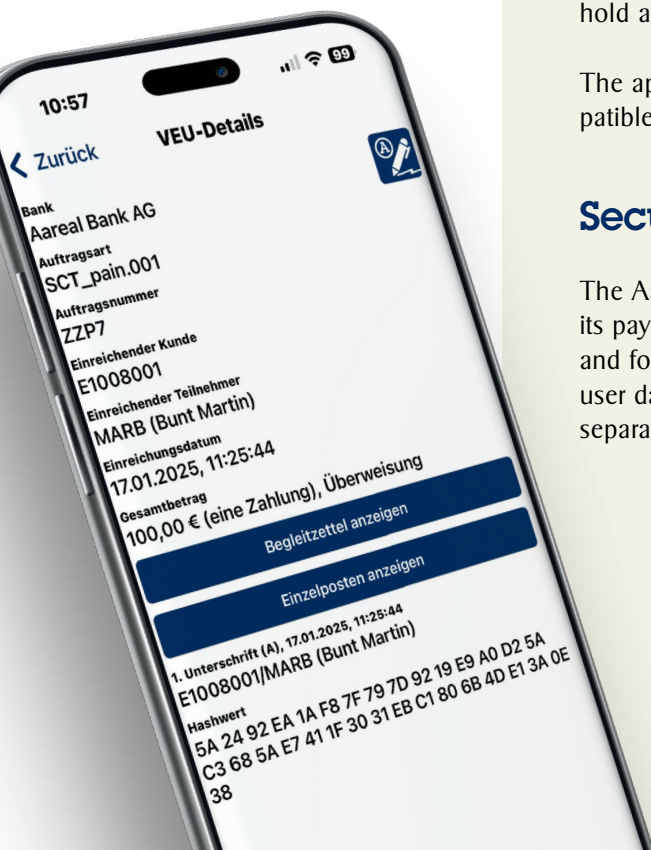

Further features include retrieving and viewing detailed electronic account information.

All features at a glance

✓ **Secure authorisation & cancellation –** release or reject pending payment orders directly via the app

✓ **Transparent payment processes –** obtain a detailed overview of relevant order information

✓ **Transactions overview –** keep up to speed by retrieving electronic account information at any time

✓ **Multi-bank functionality –** connect account details from different banks to EBICS and manage them all easily via the app

Aareal
YOUR COMPETITIVE ADVANTAGE.

User requirements

Aareal Sign is an exclusive application available only to registered clients who hold an account with Aareal Bank and have purchased a use licence.
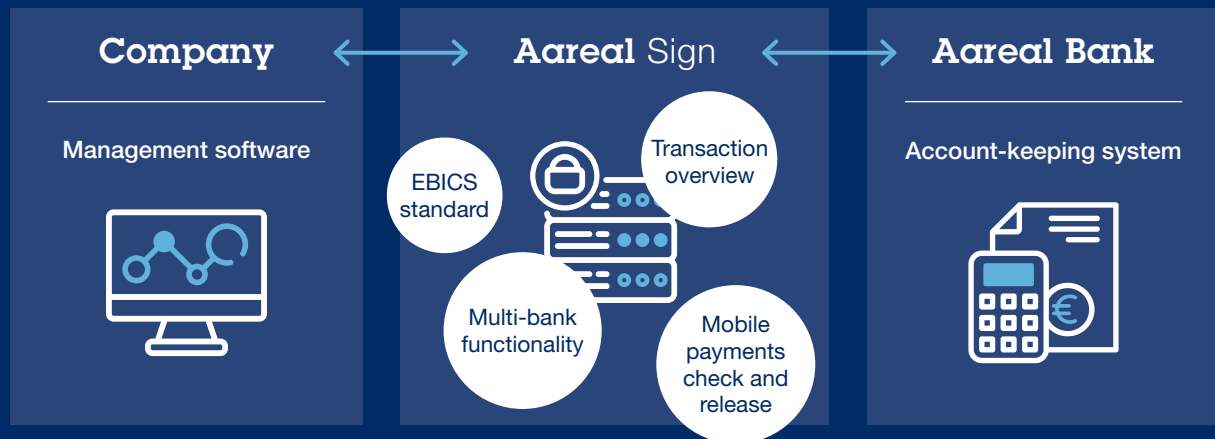

The application was developed for iOS/iPadOS devices and as such is compatible with the Apple devices iPad, iPad Pro and iPhone.

Security

The Aareal Sign security concept meets Aareal Bank's usual high standards for its payments processes. Every user has different passwords for starting the app and for signing payments for release, and the digital bank key that ensures that user data is kept confidential while the Aareal Sign app is being used is stored separately on iOS devices and cannot be read by any other application.
